NEW UNIQUE POST GRADUATE UNIVERSITY TO OPEN IN DAR ES SALAAM

A newly accredited University in Dar es Salaam Chamazi campus is to open its doors to post graduate students in 2016

Tanzanite University is a unique creation that is intended to focus principally on providing and delivering Research based Higher Degrees (Masters and Doctorates) with a strong sustainability emphasis initially in Commerce/Social Sciences to qualifying applicants in Tanzania and to those in its neighbouring countries.

The founder of the University (Professor Robert Rugimbana) expressed his excitement for the proposed new addition to the tertiary level landscape of Tanzania.

“A lot of hard work, planning and thought has gone into providing Tanzanian and regional tertiary students with practical, interesting and useful degrees that will add value to their relevant sectors of operation. We pride ourselves in aiming to provide, easily accessible and convenient learning means using the most interactive and stimulating learning techniques”

To this end the TANZANITE UNIVERSITY (TU) has positioned itself to provide two forms of Educational services at the level of Post Graduate Education.

1. To teach its own students, formally accredited Research Higher Degree (RHD) programs at the level of Masters and Doctoral Programs that are supported by several carefully conceived foundation taught courses and complemented by a series of not for credit Executive Management Programs.
2. To provide Professional and Academic Support Services to staff of other Institutions of Higher Education that will result in their attainment of their Masters or Doctoral Qualifications.
